C. Post Feeding Period

1. Final weighing and height taking of children beneficiaries.
2. Submission of terminal report to include all MFP data.

BNS/teachers must submit to NDA all MFP data such as final nutritional status, weights, heights, narrative and as well as summative result to report program impact.

D. Other important considerations:

1. Recommended weighing scale is hanging spring for community children & balance beam for schoolchildren.
2. Deworming shall be done at most a week prior to actual feeding.
3. Recommended time of feeding is from 8:00 to 9:00 AM or 3:00 to 4:00 PM.
4. Milk ration shall only be fed at the designated feeding center.

---

"There is no finer investment than providing milk to our children."
- Winston Churchill
Program Thrusts & Mechanics

The provision of a daily glass of milk as supplementary feeding program for the malnourished children.

The program aims to improve nutritional conditions for the children as well as provide new jobs and income for dairy farmers.

This is a collaborative effort of the National Dairy Authority, the LGUs, GOs, NGOs, and other Foundations.

Target Beneficiaries

1. Pre-schoolers
2. School Children

Beneficiaries shall receive...

- 180/200 ml sterilized/pasteurized milk/chocomilk milk per child per day
- 5 times a week except Saturdays, Sundays and holidays for a duration of 120 days

Requirements

A. Pre-Feeding Period

1. Identification of target areas & children beneficiaries
   - OPT results/school weighing results
   - Barangay/school ranking in terms of prevalence of malnutrition
   - Total population of children per baranggay or school
   - List of beneficiaries per baranggay or school indicating their name, sex, weight age, birth date, weights, heights, and nutritional status, date of weighing.
   *Severely malnourished children shall be referred to an authorized physician prior to milk feeding.

B. Feeding Period

1. Launching ceremony & start of the feeding.
2. Checking, recording & distribution of milk deliveries.
3. Conduct of regular weighing & height taking.
4. Conduct of random sampling of milk to ensure its good quality throughout the feeding period.
5. Gather height and weight from Barangay Nutrition Scholars, Barangay Health Workers, and teachers and analyze data to assess growth progress among the children.
6. Conduct of regular monitoring in the area. A monitoring team shall visit the area to check on the progress of the program implementation.

2. Milk Feeding Program Orientation with Barangay Nutrition Scholars/Barangay House Workers, school nurses, parents and beneficiaries and collaborating agencies
