The group called on NDA last Oct. 13,2011 to seek assistance on how they could avail of upgraded goats. At present, their group already has quite a number of native goats in their locality which they would like to upgrade in order to improve their current milk production.

Mr. Bayawa told them to formalize their request so that this could properly be endorsed to the agency handling goat dispersal. The group promised to send their letter as soon as possible to start an upgrading program in their municipality.
