

Doc Gorby and Sol Bautista richer by 25 cow

Husband and wife tandem of Dr. Gorby and Sol Bautista of ARFLO Farms in Tanay, Rizal got 25 imported pregnant heifers as part of the NDA's Dairy Multiplier Farm (DMF) Program.

After their first venture into dairy farming in 2008, the couple is now convinced that they are more than ready to be one of the DMF partners of NDA. Last August 8, 2012, Doc. Gorby signed the MOA acknowledging receipt of 25 Holstein-Sahiwal crosses imported from New Zealand this year. The event is seen as a positive indicator that dairying is on the rise. With his initial stocks of 3 dairy cows, the new addition will provide additional milk production and increased the dairy herd of the couple. It will also augur well on their thriving dairy enterprise. Bulk of their milk goes to their increasing Indian customers who buy raw milk regularly. Ms. Jackie Alleje, a Swiss Restaurateur is also a regular milk buyer as well as a regular customer of their meat/beef..
