

The Torejas of Ibaan, Batangas - a new breed of DMF Partners

DMF partners Arnel and Aileen Toreja of Davapan, Ibaan, Batangas share light moments with Dr. Gabby Lagamayo as they discuss the status of the dairy animals which have recently calved.

Being newbies in the industry, the Torejas couple believes that persistence, hands on, and continuous learning are essential elements in this new venture.

They also read a lot of references and research, as well as listen to and practice proper dairy husbandry management.

The couple's being sugar planters provided an edge as they have an abundant supply of sugar cane tops as forage

Milking Time

Assorted leguminous seeds ready for planting in time for the onset of the rainy season.

Chopped napier grasses

Healthy month old calves
