NDA Dairy Multiplier Farm (DMF) Program

Dairy Multiplier Farm (DMF) Payment Schemes

Dairy Multiplier Farm Program

NDA foresees increasing demand for dairy animals. To address the issues on availability, affordability and quality of dairy animals in the country, the DMF Program was crafted. The program aims to accelerate the production of high quality local dairy animals in partnership with the local dairy farmers. Thereby increasing the dairy base stocks in the country.

The DMF Program aims to have cheaper and sustainable sources of local born dairy animals; produce significant volume of milk; conserve foreign exchange thru savings on imports of dairy animals; accelerate expansion of the local dairy industry; and, increase farm incomes. .

This will also serve as training farms and showcases for farmers, coops, workers, students and extension agents.
