

## **NDA welcomes BUEN IAN L. PAMAOS as Incoming Engineer**

As we prepare to for the forthcoming Batch 13 dairy animal infusion this coming June, so is NDA welcoming Engineer Buen Ian Pamaos to complement manpower in the Engineering Section of the Operations Department

A native of Sikatuna , Bohol, Ian graduated at Bohol Island State University with a BS in Mechanical Engineering under the DOST – SEI ( Science Education Institute) Scholarship Program.

Right after graduation, he managed to work as Engineer I at the Operations & Maintenance Technology Philippines , Inc. in Sta. Rosa Laguna. Then on May 2, 2012, he applied for the position of Engineer with the office.

His entry to NDA will more or less give NDA the respite from the lack of a permanent Engineer to work on the plants and other maintenance activity that we will be needing at this point where equipment installation are on-going. To Ian, our welcome and may this year auger well for your career.
