

NDA Conducts product Techno-Processing

Mr. Ronnie A. Ernie, the NDA Technical Personnel assigned to assist the new Dairy Multiplier Farm Partner, conducted an on-site milk processing technology demo on various milk and dairy products. The women constituents of FORUM (Farmers Organization for the Rural Upliftment of Mindoro) will be the direct beneficiaries of the demo, coming from Bgy. Mapang, Bongabong, Oriental Mindoro.

FORUM dairy farm received 25 Imported Holstein-Sahiwal Dairy Cattle and the farm had a total of 13 calvings to date: 8 males and 5 female calves. Milk production is 120 liters. The ladies in the barangay processed the milk into ready to drink fresh milk and chocolate milk, white cheese, pastillas de leche, maja mais and milko jell.

The knowledge and skills learned in this activity will provide them with other means to supplement the family income as well as improving nutrition in the community and contribute to the attainment of the development goals of FORUM.
