

World Food Day Techno Demo at BSWM

In celebration of the World Food Day with this year's theme: ***"Family Farming Week: Feeding the World, Caring for the Earth,"*** the NDA conducted a techno demo on dairy products processing. This is in tandem with the Dept. of Agriculture's Mosaic Making Contest.

Participants of the said demo were comprised of parents and coaches of the children who participated in the contest.

The said activity is very timely as this will increase awareness among the participants and the public about the role of the family in helping create jobs, learning skills and trading that will redound to the benefits of the family. In turn, these families can be an instrument in helping feed the world and at the same time care for the environment that is the earth.

JR Pascual of Sta. Maria Dairy of Pulong Buhangin, Sta. Maria, Bulacan was tapped as the resource person. He shared technology on cheese making, French vanilla latte, pastillas de leche and yogurt making.

Participants were treated and sampled fresh milk, choco milk, French vanilla latte, espasol de leche and cheese. Recipes were handed out to them to serve as their guide when they go back home.

Pascual also encouraged them to engage in livelihood as the knowledge they learned during the techno demo can be useful in starting a mini-business right in their homes.
